

UC Davis Summer Abroad Internship

Environment, Green Tech & Sustainability – Thailand

Sample Internship Placements

Sustainability Intern for International Manufacturer

Work with a manufacturing company striving to become a more sustainable and environmentally responsible organization. This company is positioning itself as a leading manufacturer for its global customers through providing cost effective products and sustainability. Students should be passionate about sustainability and interested in working on a variety of sustainability-related projects within the company, and should be prepared to produce deliverables and or projects by the end of their placement.

Communications Intern for Environmental NGO

Create content, lead research, and assist in communication campaigns for an NGO that aims to raise awareness about the need to take care of the environment and develop more sustainable practices. You will develop and improve communications skills related to environmental and sustainability topics.

Data Collection and Analysis at Sustainability Non-Profit

Contribute to a non-profit organization that builds community with a commitment to environmental education and conservation, with a three-fold mission of forest neighborhoods, nurseries that provide job training, and the establishment of community plantations. You will help organize and analyze information and statistics used in fundraising and crowdfunding abroad. This internship will enable engagement with education initiatives, mainly related with conservation.

Intern at Certified B Corp

Help define the new structure for a company after becoming a Certified B Corporation. The B Corp standards involve a corporation's verified social and environmental performance, its impact on its workers and customers, and its public transparency. The business has met certain high standards established by the non-profit B Lab, which provides the B Corp certification. By interning in this company, you will acquire hands-on experience related to high-standards corporate certification on environmental and social best practices, which will be highly valuable for your future career.
